# Core Blood Profile

Patient Information Guide

Regulated by

# Welcome to London City Healthcare

Our team of Private Doctors are all highly qualified and experienced City GP's, giving you access to an expert opinion whenever you need independent, professional advice, including a huge range of blood tests.

Bloods tests can be requested as part of a group or individually. Please book an appointment with our GP to discuss any concerns or requirements further, and help decide whether other investigations are also indicated (e.g. imaging in the form of a chest x-ray).

Please note, unless a sample is being provided as part of a health assessment, a standard consultation fee is applicable for all venepuncture.

Although most test results are available within 24 hours, some tests can take longer and your GP will be pleased to discuss any specific considerations as required.

## Our standard "P2" blood profile includes:

- 38 individual blood tests derived from a single sample
- No requirement to fast before providing the sample
- Full biochemistry, haematology and blood fats profiles
- Same day/next day results & reporting

# Full “P2” Profile Content

✓ Haemoglobin

✓ Haematocrit

✓ RBC (red blood cell count)

✓ MCV (mean corpuscular volume)

✓ MCH (mean corpuscular haemoglobin)

✓ MCHC (mean corpuscular haemoglobin concentration)

✓ RDW (red cell distribution width)

✓ Platelets

✓ WBC (white blood cell count)

✓ Neutrophils

✓ Easophils

✓ ESR (erythrocyte sedimentation rate)

✓ Glucose (non-fasting)

✓ HBA1C (average blood glucose)

✓ Sodium

✓ Potassium

✓ Urea

✓ Creatinine

✓ eGFR (estimated glomerular filtration rate)

✓ Calcium

✓ Calcium (corrected)

✓ Inorganic phosphate

✓ Ferritin

✓ Total protein

✓ Albumin

✓ Globulin

✓ Total Billirubin

✓ Alkaline phosphatase

✓ AST (aspartate aminotransferase)

✓ ALT (alanine aminotransferase)

✓ Gamma GT

✓ Cholesterol

✓ Triglycerides

✓ HDL (high-density lipoprotein)

✓ LDL calculation (low-density lipoprotein)

✓ HDL / Cholesterol ratio

✓ Cholesterol / HDL ratio

✓ TSH (thyroid stimulating hormone)
